I am a data scientist with a passion for medical research to enhance the quality of healthcare with artificial intelligence. My area of expertise is deep learning, particularly in image processing, including image detection and segmentation. Currently, I'm interested in Vision Transformer (ViT) and Reinforcement Learning (RL). I constantly update the latest developments in the AI field.

PUBLICATIONS

Segmentation of Lung Lobes and Lesions in Chest CT for the Classification of COVID-19 Severity

*This preprint is Under Review at Scientific Reports. DOI: https://doi.org/10.21203/rs.3.rs-2466037/v1

In this study, represent a model for Semantic Segmentation of the lung lobe area and lesions by using 3D-UNet deep learning modeling technology in combination with a pre-trained model, e.g. DenseNet. for COVID-19 severity infection analysis with DSC of 0.93

EDUCATION AND QUALIFICATIONS

Bachelor's Degree of Health Data Science

Aug 2018 - Jun 2022

Princess Srisavangavadhana College of Medicine, Chulabhorn Royal Academy and King Mongkut's University of Technology Thonburi (KMUTT) | GPA of 3.42 (2nd Class Honours)

This major focusing on the combination of the data science domain and medical knowledge, i.e. anatomy, communicable and non-communicable diseases, and precision medicine.

EXPERIENCE

Data Research management officer

Aug 2022- Present

Chulabhorn Learning and Research Center, Bangkok, Thailand

- Researching techniques and deep learning models for a medical imaging research project.
- Analyze and clean the clinical data to support the research project.
- Process structured and unstructured data such as clinical data, CT-scans
- Create a Power BI dashboard to track the performance of the organization's research publications.
- Supporting the data management unit for ISO/IEC 27001 implementation.

Internship Jun - Jul 2021

Medical bioinformatics program, Siriraj, Mahidol University

 Developing a computer vision-based image segmentation program to detect dengue virus foci in focus forming assay (FFA) with a specificity rate of 93.75%. Follow this project here: https://github.com/si-medbif/dengue_foci

SKILLS

Hard Skills

- Coding with Python, SQL, HTML, CSS, Basic R
- Experience with Jupyter Notebook/Lab, Colab, Power BI, Power Automate
- Deep learning for image detection and segmentation, Yolov8, Vision Transformer
- NLP: Transformer Language Models, Sentiment analysis, Text analytics, Web scraping

Soft Skills

- · Responsibility, Problem-solving, Attention to detail, Creativity, Teamwork
- TOEIC score: 655

PROJECT	
Jltra-Wideband Based human activity classificationDeveloped a deep learning model for human activity classification using YOLOv8-CLS and Vision Transformer	Mar 202
 • Created an information retrieval question-answering system for financial data 	Mar 202
 Dbstacle Avoidance with Reinforcement Learning for Robotics Developed a Q-learning algorithm for obstacle avoidance in robots and created a map for reinforcement learning simulation in Gazebo 	Feb 2023
Liver lesion detectionDeveloped a deep learning model for the detection of liver lesions, utilized YOLOv8	Feb 2023
Poverty Estimation from Non-Tradition data (GEE) Performed data cleansing on both structured and unstructured data obtained from Google Earth Engine (GEI)	Feb 2023 E).
Research publications dashboard Created a dashboard using Power BI to effectively visualize the performance of the organization and researcl	Oct 2022 n KPIs
Person Activity Detection Utilized YOLOv5 to detect human activity in a live video stream from a webcam	Jun - Jul 2022
Aug . • Predicting precentage of infection, using semantic segmentation technique	2021 - May 2022
 Dengue foci count system A project aims to count numbers and measure areas of dengue foci from focus forming assay (FFA) 	Jun - Jul 2021
ACTIVITIES	
 Participated in Super AI Engineer Season 3: Level 2 (https://superai.aiat.or.th/) Participated in Super AI Engineer Season 3: Level 1 (https://superai.aiat.or.th/) 	Jan - Mar 2023 Oct - Dec 2022
 Attendance in the competition AI Hackathon Online #1 "Covid-19 Image" for classification of Chest X-ray Volunteered for The Princess Mother's Medical Volunteer Foundation at Phayao University 	2020
 Attendance in the Princess Chulabhorn International Oncology Conference (PCIOC 2019) at Centara Grand Hotel & Convention Centre, Bangkok, Thailand 	2019
 Representative from Faculty of Medicine and Public Health in a field study at Hospital & Public Health 	2019

Dec 2022

Sep 2022

Apr 2022

Apr 2022

INTERESTS / HOBBIES

[credential]

• Reading publications about technology and innovation

• Super AI Engineer Season 3 Examination Certificated by AIAT [credential]

• Perform Foundational Data, ML, and AI Tasks in Google Cloud [credential]

• Good Clinical Practice: ICH GCP E6(R2) for Investigator and Trial Staff by Chulabhorn Royal Academy

• Stock Investment, particularly in tech companies

• BigQuery for Machine Learning [credential]

- Attending technology conferences
- Listening to podcasts
